

Interested in working at one of the most influential online mapping companies in the history of the Internet?

We are looking for intelligent, enthusiastic over-achievers, who are passionate about software and systems engineering to participate in an internship program. This includes candidates that are interested in working at a world-class company – or are required to participate in an intern program for college credit.

As a MapQuest intern, you will be working as an integrated member of a fun software team utilizing Agile development processes. As part of your participation, you will work closely with the team members within a project. You will also gain experience in working with Project and Product Management personnel.

Come see how real companies develop outstanding software in a competitive market space! Where else could you say that you worked for and with the people that started online mapping!

The ideal candidate can expect to work in one or many of the following disciplines:

**Development:**

- Unix/Linux
- Shell Scripting
- Java and/or C/C++
- XML
- Content Management Systems
- Source Control concepts and systems
- UML and design principles
- Client side development skills (XHTML, Javascript, CSS, AJAX)
- Multi-threaded development.

**Data:**

- Oracle or related RDBMS development skills
- Geographic Information Systems concepts, procedures and applications, including data analysis, transfer and formatting
- Formal training or experience with ESRI tools and GIS.
- A basic understanding of the concepts behind data management in a relational database

**Software Development Process:**

- Software Development Life Cycle (SDLC)
- Agile development processes

**General:**

- A positive attitude
- Excellent written and oral communication skills
- A can do spirit
- Eager and willing to learn
- Always the person that could solve any challenge

**About MapQuest.com**

Since 1996, MapQuest.com has been helping people find places, get there, and find places nearby. MapQuest.com is consistently ranked as the #1 mapping site and #1 directories site (comScore Media Metrix), as well as a Top 10 US Web brand (Nielsen Netratings). We are headquartered in Denver, Colorado and Lancaster, Pennsylvania, and offer Internet, Wireless and Business Solutions worldwide.
